Solar Tube Price List

Frequently Asked Questions

How much does a solar tube cost?

The cost for a solar tube alone ranges from \$200 to \$500+, depending on the size, brand, and model. 10-inch and 14-inch tubes are the most common sizes as they fit between standard 16"-on-center roof rafters. Choose an impact-resistant acrylic dome if you live in an area with frequent hurricanes or severe storms.

What is the best solar tube?

Just ensure the dome of the tube is made out of polycarbonate. The best solar tube is undoubtedly the 13-inch Natural Light energy systems and solar tubes. This is because it provides you with everything you need to get great natural light. As well as this, it's incredibly durable, and therefore you'll never need to spend money on another.

What are the different types of solar tubes?

There are two types of solar tubes; rigid and flexible. You'll want to choose the correct one for your home depending on the distance you want the light to travel. A rigid light will usually give off more light than a flexible one because it offers a straight path down to the room.

What is a solar tube?

A solar tube is a reflective metal tube that carries light from the roof through to the home's interior. The roof end has a weather-proof acrylic globe or flat glass cover. On the interior, where the tube ends and diffuses light into the room, the solar tube looks similar to recessed lighting.

Where can I install a solar tube?

A skylight installer near you can typically install a solar tube. You may also find solar tube installation through roofing contractors, solar contractors, and directly through solar tube dealers. Where can you install a solar tube? Solar tubes can be installed almost anywhere you're looking to add some natural light.

Sunpipe | natural daylight | sun tunnels | solar tubes | light tubes

SUNPIPE TUBE. Our Sunpipe tubes are manufactured from PVD coated aluminium, unlike other manufacturers who use plastic laminate films. This distinction is key to the quality of the Sunpipe - Whilst a plastic laminate film may boast a 1% higher total reflectance initially, they lose most of their reflectance over time and are susceptible to delamination.

10" Solatube Skylight Kit, Extensions

The solar tube adds wonderful natural light into small space. Posted by Janice Breitweiser on Aug 9th 2022 5 The finished product is awesome! The white light fills the kitchen, much better than the yellowish light that was coming from the old Solar Tube. I wouldn't hesitate to recommend Solartube Home if you need these types of services!

How much does a skylight cost in Australia? | Solatube

1. Traditional Square Skylights. As the Australian pioneer in quality skylight and natural lighting systems, we truly believe these products are a thing of the past. They often provide poor light performance by utilising flex duct or Gyprock to line the light well up to the skylight, only allowing access to see the sky directly under the skylight.
